

ST. VINCENT COLLEGE OF CABUYAO, INC.

PHILOSOPHY

We believe in contributing to the levelling of the playing field by providing access to affordable but quality and relevant education. Our founders have ingrained in the fiber of our institution that we are not in the business of building an enterprise, but rather in the the ministry of building lives.

We believe that the whole is greater than the individual parts. Although we recognize and celebrate outstanding individual inputs, we know that properly guided synergistic teamwork, anchored on noble and honorable goals, will produce even greater results. Thus, we adhere to strong collaborative, mutually-reinforcing, efficient, and responsible working systems.

We promote the culture of resiliency by recognizing, understanding, and appropriately responding to challenges posed by constant and disruptive changes in the institutional environment and develop appropriate and calibrated responses consistent with the Institution's Vision, Mission, Institutional Philosophy and Values.
